Software Projects

MatchMapp.live, Lead Developer ✍

Technologies used: Ruby | Rails | Bootstrap | StimulusJS | PostgreSQL | Web Socket

A web application to find local venues screening your favorite sports events.

- Collaborated in Figma prototyping and design.
- Created back-end logic and functionality.
- Supervised and organized task development.
- Managed version control and deployment issues.

Leave Everything, Web Developer ✍

Technologies used: MongoDB, Express JS | React JS | Node JS | Bootstrap | Mongoose

Single page blog web app.

- Developed Back-end logic and functionality.
- Designed front-end and functionality.
- Database modeling.
- Handle deployment issues and bugs.

Babylon, Lead Developer ✍

Technologies used: Ruby | Rails | Bootstrap | Stimulus JS | PostgreSQL | Web Socket

Web app to find local professional services in different languages.

- Designed and prototyped app.
- Created and designed database.
- Built backend logic and frontend UI.

Education

Junior Full Stack Developer, Le Wagon ✍

10/2020 – 12/2020 | Barcelona, Spain

An intense Ruby | Rails full-stack web development Bootcamp.

Bachelor's Degree in Laws, Universidad Centroamericana José Simeón Cañas ✍

03/2005 – 12/2007 | La Libertad, El Salvador

Professional Experience

Backend Developer, Earthster ✍

2021 – present | Helsinki, Finland

Backend developer for a small environmental startup where I write clean, maintainable, well tested features. Due to the size of the team I also implement front-end features.

Tools: Ruby, Ruby on Rails, Stimulus JS, D3 JS, Docker, Elasticsearch, PostgreSQL

Team Lead, Mill Valley Beerworks ✍

2015 – 2018 | Mill Valley, CA, United States

- Developed and implemented team strategies to drive up sales and meet the company daily goal of USD 40 per check average.
- Supported management in the service and product training of new staff members
